Scheduling Information

Our main concern is to provide quality orthodontic treatment in a caring, professional setting. If we try to see our patients in just a small segment of our workday, we find that we are unable to meet our professional goals.

Most appointments are less than one-half hour long. We do respect your time and try to schedule so that there is minimal waiting time.

Almost all of our parents ask if it is possible to see their child before or after school. This is understandable but also impossible.

During the school day, there may be classes that can be missed one time per month without any negative effect on a child's education. There will also be In-Service days and those are good times to try and schedule an appointment. Perhaps the benefit of allowing us to complete the orthodontic care to the best of our ability will far outweigh any inconvenience.

Appointments in the middle of the day and during your lunch hour are easier to make and are more efficient for your time. The parking is also easier to find and traffic is lighter.

We make a strong commitment to you and your family. Please allow us the opportunity to completely fulfill it.

In case of an orthodontic emergency please call 884-5610.

THANK YOU
